

Living Lab

The Living Lab Elementary Program is a fun and engaging science-based program that provides children in grades K-5 with valuable grade-appropriate science lessons. Living Lab is a series of two-hour educational field trips/workshops that provide hands-on botany-based curriculum. Each grade-level-appropriate activity aligns with the Washington State STEM or social studies CORE curriculum. The Bellevue Botanical Garden Society offers this extremely popular array of children's classes for free as a contribution to the community.
